Located in the foothills of the Sierra de Mijas, with views of the surrounding greenbelt, this project offers an exclusive atmosphere. The development consists of low-rise buildings with just two floors—garden-level and penthouse. Each penthouse has 3 bedrooms and 3 bathrooms, and there are two main types: penthouses with jacuzzis, and penthouses with rooftop solariums of up to 130 m². Every unit comes with two parking spaces and a large storage room. This project is one of the first eco-friendly developments on the Costa del Sol, boasting the prestigious BREEAM and WELL certifications for sustainability. Natural light enhances indoor spaces, while acoustic control measures ensure maximum comfort. The development prioritizes ecological preservation, maintaining natural areas and replanting local vegetation.
