These villas are being built in a complex with a total of 24 villas built in three construction phases. The hillside location combined with the unique architecture and construction of each villa ensures that each property in the complex offers stunning views of the Atlantic Ocean and over the neighboring island of La Gomera, as well as beautiful panoramas of the twinkling lights of the tourist resorts in southern Tenerife.

The indoor and outdoor living spaces are connected in a delightful way that allows you to immediately connect with the horizon, ocean and surrounding landscape. Everything flows together when you find yourself in these fantastic homes.

The construction uses special stone and glass structures. The villas stand out for their striking, exclusive design. A sense of homeliness is achieved through the use of natural materials in neutral tones, both in the construction and in the interior, which complement the surroundings, as well as high-quality appliances.

All around the villas you will find fantastic green areas with exotic plants and palm trees to completely unwind and escape from all the hustle and bustle.
