

Landa till salu i Sedella, Málaga

210.000€

This huge plot measures approximately 34,000m². It is located close to the village of Sedella, twentyfive minutes from the coast and less than an hours drive from Málaga airport. The undulating land has two ruins on it and therefore offers many possibilities for development, especially as the ruins are located quite far away from each other. There are many trees on the land including Almond trees, old Algarrobo trees and old Olive trees. From the site there are panoramic views of the surrounding countryside, the Sierra Almijara mountains and the Sierra Tejeda mountains including the highest mountain in the area la Maroma. The plot is being sold with two electricity connections. Mains Water is available in the track adjacent to the land. A wonderful plot in a peaceful location.
